Immanuel Wallerstein, Carlos Aguirre Rojas, Charles C. Lemert : Uncertain Worlds: World-systems Analysis in Changing Times (Great Barrington Books) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Uncertain Worlds: World-systems Analysis in Changing Times (Great Barrington Books):

Uncertain Worlds is the definitive presentation of the evolution of world-systems analysis from the point of view of its founder, Immanuel Wallerstein. Few theorists have offered a more systematic theory of what has become known as 'globalisation' than Wallerstein. The book includes a one-of-kind interview with Wallerstein by Carlos Rojas, a conversation between Wallerstein and Lemert about the history of the field as it has come down to the present time, a long essay by Lemert on the uncertainties of the modern world-system, as well as a preface by Rojas and a concluding essay by Wallerstein. No other book lends such biographical, historical, and personal nuance to the biography of world-systems analysis and, thus, to the history of our times. The will be a key reference book for students of global politics, economics and international relations.

About the Author Immanuel Wallerstein has been a Senior Research Scholar at Yale University since 2000, having taught previously at many distinguished universities. Among his many books, he is the author of the magisterial 4-volume work, *The Modern World System*. Volume IV is recently published. Charles Lemert is Senior Fellow in the Center for Comparative Research, Yale University, and Vice-Chancellor's Professorial Fellow, University of South Australia, Adelaide. He is the author of numerous books including *Uncertain Worlds*, with Immanuel Wallerstein and Carlos Rojas, and *Thinking the Unthinkable*. Carlos Aguirre Rojas, Researcher at the Institute for Social Research, the Mexican Autonomous University, is the author of influential books in Spanish and in English.
