Urban Theory: New Critical Perspectives provides an introduction to innovative critical contributions to the field of urban studies. Chapters offer easily accessible and digestible reviews, and as a reference text Urban Theory is a comprehensive and integrated primer which covers topics necessary for a full understanding of recent theoretical

engagements with cities. The introduction outlines the development of urban theory over the past two hundred years and discusses significant theoretical, methodological and empirical challenges facing the field of urban studies in the context of an increasing globally inter-connected world. The chapters explore twenty-four topics, which are new additions to the urban theoretical debate, highlighting their relationship to long established concerns that continue to have intellectual purchase, and which also engage with rich new and emerging avenues for debate. Each chapter considers the genealogy of the topic at hand and also includes case studies which explain key terms or provide empirical examples to guide the reader to a better understanding of how theory adds to our understanding of the complexities of urban life. This book offers a critical and assessable introduction to original and groundbreaking urban theory and will be essential reading for undergraduate and postgraduate students in human geography, sociology, anthropology, cultural studies, economics, planning, political science and urban studies.

"A marvelous volume comprehensive and critical, and chock-full of conceptually and theoretically sophisticated essays superbly accessible to both postgraduate and undergraduate students alike. It presents what is often difficult material in a form much easier to understand, hence making *Urban Theory: New Critical Perspectives* an ideal tool for teaching and learning." David Imbroscio, Professor of Political Science and Urban and Public Affairs, University of Louisville, USA "This collection of essays provides an excellent introduction to a series of key debates in urban research. The contributions draw on a diverse range of literature and contemporary examples." Matthew Gandy, Professor of Geography, University of Cambridge, UK "Urban Theory: New Critical Perspectives is a clever, timely roadmap for the often varied terrain of contemporary urban theory. The range of topics is ambitiously eclectic, yet carefully organized and edited for coherence. This reader is a must for scholars and students of urban sociology, politics, planning and geography." Jason Hackworth, Professor, Department of Geography and Planning, University of Toronto, Canada "This collection of insightful essays provides students of cities with an A-Z guide to some of the key concepts popularized in contemporary Anglophone critical urban theory as it seeks to make sense of global urbanization and urban life." Helga Leitner, Professor of Geography, Department of Geography, University of California, USA About the Author Mark Jayne is Professor of Human Geography at Cardiff University, UK.
