William E. Wagner : Using IBM SPSS Statistics for Research Methods and Social Science Statistics before purchasing it in order to gage whether or not it would be worth my time, and all praised Using IBM SPSS Statistics for Research Methods and Social Science Statistics:

0 of 0 people found the following review helpful. AWESOMEBy rw#5JUST AWESOME. IF YOU ARE USING SPSS - THIS IS A MUST this book takes you through every possible spss scenario your prof might throw your way AND you learn that you can really do some neat stuff with statistical research thanks to GOD who made people smart enough to make programs so you don't have to do the formulas yourself. if I were you, I would buy the SPSS program AND THIS BOOK before your first statistics class in college.0 of 0 people found the following review helpful. SchoolBy Toya EdmeadsI needed the book for school, I did not read all of it, yet I will it for future reference!0 of 1

people found the following review helpful. Good condition. By K.D. Transaction completed as agreed. (I don't have anything else to add and resent being forced by this stupid form to write more here than I have to say!!!!!!!)

Ideal either as a companion to a traditional statistics or research methods text or as a stand-alone guide, *Using SPSS for Research Methods and Social Statistics* is a useful reference for those learning to use the SPSS software for the first time or those with only basic knowledge about SPSS. This student-friendly resource shows readers how to use images and directions drawn from SPSS Version 20 and now uses the latest version of the General Social Survey (GSS, 2010) as a secondary data set.

"An excellent resource for students learning SPSS for the first time-easy to follow." (Mieko Smith Ph.D) About the Author William E. Wagner, III, PhD, is a Professor of Sociology at California State University Channel Islands. Prior to coming to CSU Channel Islands, he served as a member of the faculty and Director of the Institute for Social and Community Research at California State University Bakersfield. He completed his PhD in sociology at the University of Illinois, Chicago. Dr. Wagner also holds an undergraduate degree in mathematics from St. Marys College of Maryland, as well as an MPH degree (Master of Public Health) from CSU Northridge. He has published in national and regional scholarly journals on topics such as urban sociology, homophobia, academic status, sports, and public health. Dr. Wagner is coauthor (with Earl Babbie, Fred S. Halley, and Jeanne Zaino) of the eighth edition of *Adventures in Social Research* (2012), published by SAGE. Dr. Wagner can be located on the Web at faculty.csuci.edu/william.wagner or www.facebook.com/incredibilly.
